## SUMMARY

I've been working for the last 4 years at Inditex as a frontend engineer and also leading a scrum team. I have a deep understanding about frontend technologies and techniques in a highly traffic retail ecommerce. I love clean code and keeping up-date with the latest technologies. I'm responsible and I'm a passionate frontend developer. I'm collaborative and I'm not afraid to fail.

## HIGHLIGHTS

- Bachelor of Science (BS): **Computer Engineering Degree**. Ramon Llull University Barcelona
- **Angular**, Angular 2, React, jQuery
