## SUMMARY

I've been working for the last 4 years at Inditex as a frontend engineer and IT Manager. I have a deep understanding about frontend technologies and techniques in a highly traffic retail ecommerce. I love clean code and keeping up-date with the latest technologies. I'm responsible, collaborative.

## HIGHLIGHTS

- Bachelor of Science (BS): **Computer Engineering Degree**. Ramon Llull University Barcelona
- **Angular**, Angular 2, React, jQuery  
**Typescript**, Javascript, ES6, Promises, RxJS  
Html5, LESS, Sass, Css3, Bootstrap.  
**RESTful** web services  
Webcomponents, SPA
- PHP, Composer, Laravel, Symfony, C, C++  
SQL, Parse, MySQL, JSON
- **Ecommerce**. Frontend at **INDITEX**. IBM Websphere Commerce
- **Agile** Methodologies. Kanban, TDD, Extreme programming, Burn-down chart
- **JIRA**, Confluence  
**Jasmine**, Protractor, Karma, Robot framework, Selenium
- Functional Software Analysis  
**Project leading**  
Responsive Web Design, Usability  
Continuous Integration  
Jenkins, Node, Gulp, Grunt, Bower, Maven
- **Sublime**, **Webstorm**, Eclipse, jsHint, Unix Terminal, Photoshop  
**Git** / SVN
- Clean Code, Design patterns

## Experience

### IT Manager and Front End Software Engineer

Stradivarius – INDITEX Group

*October 2011 – Current*

Leading the ecommerce IT department and also involved in the front development of [www.stradivarius.com](http://www.stradivarius.com).

Stradivarius.com is one of the most successful retail ecommerce with more than 200.000 visits per day.

Working closer with project manager to meet business requirements. Providing constant tech and usability improvement, and also performing as product owner.

The frontend is built around jQuery and the backend used IBM WebSphere Commerce. We used an API Rest to handle front requests to the back and vices versa. During my time at Inditex, we completely redesign and rewrite all Stradivarius frontend. We made it responsive and adopted MVC model.

We use scrum as software development methodology. As we are a small team sometimes I preform as product owner, scrum master and developer as well.

I was also got involved in QA task to ensure final quality.

- Playing an integral part in development and management of the ecommerce: [www.stradivarius.com](http://www.stradivarius.com) (more than 200.000 visits per day)
- Font end was an MCV web application with heavy use of ajax and jquery.
- Leading a scrum team
- Front-End Engineer
- Product Owner. Business requirements analysis, detailing user stories and acceptance criteria
- Outsourcing development management
- Functional Software analysis
- Using JIRA and Confluence for project management and also develop technical documentation
- New openings technical support (identify and deploy new developments and testing)

*Technologies/Methodologies used:* jQuery, React, API REST , Agile, HTML, CSS, MCV, SVN, Responsive web design

**Full-Stack Software Engineer**

Numon

*June 2010 – October 2011*

Front and back development of a toy eCommerce. The solution was built using php, mysql, jquery, html and css. We made it from scratch no framework was involved.

- Front and back development of a toy eCommerce  
Front: jquery, html and css.  
Back: php, mysql and phpmyadmin  
Ecommerce: <http://www.hobbyjoguiba.com/>

*Technologies/Methodologies used:* PHP, MYSQL, jQuery, PHPMYADMIN, HTML, CSS

**Full-Stack Software Engineer**

La Factoria

*January 2006 – September 2009*

Developing a wide range of projects. Most of them were websites and e-learning child games. We used to use the adobe flash platform for games and wordpress for websites

- Front and back development for clients such as: Movistar, Grupo planeta, Generalitat de Catalunya.
- E-learning

*Technologies/Methodologies used:* Flash, AS3, PHP, MYSQL, HTML, WORDPRESS
