  Project leading
  Responsive Web Design, Usability
  Continuous Integration**.** Jenkins, Gulp, Grunt, Bower, Maven

- Clean Code, Design patterns

Experience

IT Manager and Frontend Software Engineer
Stradivarius – INDITEX Group

October 2011 – Current

Leading the ecommerce IT department and also involved in the frontend development of www.stradivarius.com.

Stradivarius.com is one of the most successful INDITEX retail ecommerce with more than 200.000 visits per day.

Working closer with project manager to meet business requirements. Providing constant tech and usability improvement, and also performing as product owner.

The frontend is built around jQuery and the backend used IBM WebSphere Commerce. We used an API Rest Service to handle requests from front to the back and vices versa. During my time at INDITEX, we completely redesign and rewrite all Stradivarius frontend. We made it responsive and adopted MVC model.

We used scrum as software development methodology. I also performed as product owner, scrum master and frontend developer.

I was also got involved in QA task to ensure final quality.

- Playing an integral part in development and management of www.stradivarius.com ecommerce
- Font end was an MCV web application with heavy use of ajax and jQuery.
- Leading a scrum team
- Frontend Engineer
- Product Owner. Business requirements analysis, detailing user stories and acceptance criteria
- Outsourcing development management
- Functional Software analysis
- Using JIRA and Confluence for project management and also develop technical documentation
- New openings technical support (identify and deploy new developments and testing)

Technologies/Methodologies used: JavaScript OOP, jQuery, MVC, AJAX, API REST, Agile, HTML, CSS, SVN, Responsive web design

Full-Stack Software Engineer
Numon

June 2010 – October 2011

Front and back development of a toy eCommerce. The solution was built using php, mysql, jquey, html and css. We made it from scratch no framework was involved.

- o Front and back development of a toy eCommerce
  Front: jquey, html and css.
  Back: php, mysql and phpmyadmin
  Ecommerce: http://www.hobbyjoguiba.com/

Technologies/Methodologies used: PHP, MYSQL, jQuery, PHPMYADMIN, HTML, CSS

Full-Stack Sofware Engineer
La Factoria

January 2006 – September 2009
